Shrubs for this planting delivered by Cutting's Nursery on July 17
and evergreens planted October 18, 1935.

Same home, January 10th, 1945.

Home of Mr. and Mrs. A. L. Wallace, Second Street N.W., Rochester

CUTTING'S NURSERY

BYRON --- MINNESOTA

This Catalog Is Our Invitation to You . . .

TO VISIT OUR NURSERY AND GREENHOUSE THIS SPRING, where you will find almost everything you can think of in the line of trees, shrubs, evergreens, fruit trees, perennials and vegetable and flowering plants.

For the past ten years a large proportion of our business has been handled on a "Cash and Carry" basis and we believe that the thousands of people who have visited our nursery during that time will agree that this method is much superior to the old methods of either having an agent sell you an order with his pretty pictures and high prices, or buying from a catalog of a distant nursery and not knowing what you are going to get until it arrives, and then usually being disappointed in the small plants you receive.

QUALITY.—We have always endeavored to produce stock of the very best quality with respect to stockiness, size, hardiness and good root system. We are especially proud of our ornamental shrubs and we know that the very few nurseries producing as good shrubs as we do will charge you much more for them.

PRICE.—Our prices are about one-half those charged by tree agents, and the only nurseries that can sell cheaper than we do are those farther south where they have cheap labor and a longer growing season—and produce stock that will not stand our cold winters.

CONVENIENCE.—Our nursery is not over an hour's drive from any home where these catalogs are sent; there are men here to wait on you every week-day from 6 a.m. to 9 p.m.; and, if the stock you want is not already dug, we can soon get it ready for you.

SEEING WHAT YOU ARE GETTING.—Many of our customers tell us about having bought trees or shrubs from some distant nursery and being terribly disappointed in what they received. Come here and you see just what you are getting and you have a chance to compare the different sizes and select the one best adapted to your needs.

RELIABLE INFORMATION.—One advantage you have in coming directly to our nursery is that you may ask questions about the care, growth and other matters pertaining to the varieties in which you are interested and they will be answered by men who have had years of experience in handling plants and trees.

Landscape Service

If your home needs some trees, shrubs and evergreens and you do not know what to plant or how to arrange it, we want you to feel free to ask us to give you the benefit of our many years of experience in planning and planting home grounds. We will be glad to go to your home and assist you with your problems about foundation plantings, "outdoor living rooms," hedges, windbreaks and orchards.

We will tell you what you need and you will find that our prices are very reasonable and our stock of the highest grade. This service is free and places you under no obligation.

If you are interested in any of this service, kindly let us know as soon as possible, as we may not be able to furnish any of this service except in February and March.

PLEASE DO NOT EXPECT DIGGING DONE ON SUNDAY

HARDY FLOWERING SHRUBS

MUCH OF THE BEAUTY in the landscape planting of any home is supplied by shrubs. Their uses are legion and their cost is nominal. It is the softening grace of such shrubs as Spireas, Snowberry, Hydrangea, Barberry and others of like nature used about the angles and corners of the house, which makes the transformation from bareness to beauty. Tall shrubs, such as Lilacs, Honeysuckles, Mock-orange, etc., find their proper place in the border along the boundary or in plantings which serve to screen out unattractive views. In fact there is a place where most every type of shrub can be effectively used. By choosing carefully it is possible to have practically continuous bloom in the shrub border. A few of the colored twig sorts will liven up the planting in winter.

FLOWERING ALMOND

A very beautiful and graceful shrub of medium height. It is covered with very double pink flowers in early spring before other shrubs have budded and is exceedingly attractive. 2-3 ft., 60c each.

BARBERRY

THUNBERGGI—A round, bushy, graceful plant. Bright green in summer, the leaves becoming brilliant red in fall, with a handsome covering of scarlet berries that last into the winter. Very attractive when used as a specimen plant or as an edging plant for borders, foundations or hedging. See other prices under "Hedges." Select plants, 12-18 inch, 35c; 18-24 inch, 45c; 2-3 ft., 60c.

RED-LEAVED—Has rich, bright red foliage in spring that remains so during the summer if in full sun. Is usually beautiful in fall with the red berries, and bronze and yellow of the foliage. A splendid foreground shrub; beautiful in hedges. 12-18 inch, 40c each; 18-24 inch, 60c.

KOREAN—A new Barberry from Korea; straight upright grower. Has rich vari-colored foliage, deepening in color in the fall. Does not spread rust. Red berries. Suitable for hedges and specimen plants. 18-24 inch, 35c; 2-3 ft., 50c.

THORNLESS BARBERRY

Most everyone will agree that the Thunberg Barberry is one of our most attractive shrubs and has many uses, but when used in some locations its plentiful supply of briars has decided disadvantages.

But now! Someone has taken off the briars and you can plant barberries that are fully equal to the Thunberg variety in every way and the stems are as smooth as a Spirea bush.

Bushy plants, 18-24 inches, 65 cents each; 3 for \$1.75; 12 for \$6.00.

MENTOR BARBERRY

Very rugged, strong, upright growing branches and quite formidable thorns, foliage is heavy and thick and of perfect color—a green as dark as the Japanese Yew. The Mentor Barberry has three valuable qualities;

First—its ability to withstand heat and drought. During the hottest and driest weather there is never any sign of wilting or burning.

Second—Its sturdy, erect growth carries a thick dark green foliage right down to the ground. Is never bare-legged.

Third—It holds its foliage later than any other shrub, usually shedding its leaves about Thanksgiving, altho at this writing (Jan. 18th) our bushes are still in full foliage.

Fine sturdy bushes, 18-24 inches, 65c each; 3 for \$1.75.

CARAGANA

SIBERIAN PEA TREE—Extremely hardy. Blossoms are pea like and yellow in color, coming forth in small clusters in late spring. Fine for border or group planting. Does well in shade. 2-3 ft., 35c; 3-4 ft., 50c.

PIGMY—A new dwarf shrub, ideal for a low hedge because it requires little pruning and naturally maintains a dwarf compact shape. If not sheared it attains a height of three feet. The foliage is fine and dense. In spring the hundreds of small golden yellow flowers add much to the interest. 12-15 inch, 30c each; \$3.00 per 12.

CORALBERRY

A low, slender branching shrub valuable for planting in shady places and for covering steep slopes. Its beauty lies in the masses of coral berries that ripen in the fall and usually adhere all winter. 2-3 ft., 50c each.

COTONEASTER

A beautiful, very symmetrical growing graceful shrub that is useful for planting where a medium-sized shrub is required. Has rich, dark glossy green foliage. Splendid for shady places. 2-3 ft., 50c; 3-4 ft., 65c.

DOGWOOD

SIBERIAN RED TWIGGED—Good for border plantings where the smooth slender bright red branches make a pleasing contrast with snow and evergreens. Small white blooms early in summer, succeeded by a fall crop of ornamental berries. 3-4 ft., 50c; 4-5 ft., 75c.

ELDER

GOLDEN LEAF—Bright golden yellow foliage throughout the summer. The large white flower heads appear in July, followed by black berries on which birds like to feed. 3-4 ft., 50c.

CUT LEAF—The leaves of this variety are fernlike in formation and the shrub is especially effective in masses. 3-4 ft., 50c.

CISTENA

PURPLE LEAVED SANDCHERRY — Grows 3 to 4 ft. high, spreading about the same. Foliage of a rich dark red which makes a valuable contrast in shrub plantings. 3-4 ft., 50c.

FLOWERING CRABS

HOPA—One of the most beautiful of Prof. N. E. Hansen's productions. In spring the tree is a mass of dark red flowers, in fall covered with dark red fruits, which make a delicious jelly. 5-6 ft., \$1.50; 6-8 ft., \$2.00.

RED SILVER—A very attractive lawn tree with maroon-red leaves overlaid with silver on the under side. Has dark red blooms followed by dark red fruit which hangs on until winter. 5-6 ft., \$1.50; 7-8 ft., \$3.00.

FLAME CRAB—A hardy Minnesota seedling producing a dense mass of white flowers shaded faint pink, followed by an immense load of small, brilliantly colored fruits of excellent quality. 5-6 ft., \$1.50.

BEAUTY CRAB—One of the newest ornamental Crabs and it has a definite place in the landscape planting on account of its pyramidal habit of growth. If you do not like the appearance of the light pole in the corner of your lot or have some other spot requiring a tall slender tree, then plant the Beauty Crab. Trees fifteen feet high have a spread of less than four feet. Bloom is crab apple pink changing to white. Fruit is a bright pink, about the size and shape of Strawberry Crab and is valuable for any culinary use. 5-6 ft., \$1.50; 7-8 ft., \$3.00.

CURRENT

ALPINE—One of the best shrubs for very shady locations. A dwarf shrub of dense growth with fine dark green leaves. Unexcelled for a low hedge. 12-18 inch., 30c; 18-24 inch., 40c; 2-3 ft., 50c. For quantity prices see "Hedges."

FORSYTHIA

OVATA—The only Forsythia really hardy in the North. Branches are covered in early spring before the leaves appear with showy yellow blossoms. 3-4 ft., 50c; 4-5 ft., 75c.

HONEYSUCKLE

TATARIAN PINK—Strong upright growing shrubs which thrive under any conditions. Produces an abundance of pink flowers in May, followed by red berries in the fall. Its greyish-white bark is attractive at all times. One of the best shrubs for tall screens or border plantings.

	Each	12	100
2-3 ft.	\$.30	\$3.00	\$25.00
3-4 ft.50	5.00	40.00
4-5 ft.75	7.50	
5-6 ft.	1.00		

ZABELI—A dense, upright growing shrub. This variety produces a grand display of red flowers in spring followed by red berries in summer. The darkest red of the bush honeysuckles. 3-4 ft., 50c; 4-5 ft., 75c.

HYDRANGEA

HILLS OF SNOW—The flowers are, in a large way, similar to the familiar "Snowball" in appearance; conspicuously white and imposing. July to September. By cutting back to the crown each spring, the bushes may be kept round and dense at a normal height of three to five feet. They are excellent for solid low borders or in foundation plantings which will allow for about four feet. 2-3 ft., 60c.

FREE GIFT

Nursery customers this spring will be given an article which is useful in every home and will be used many times during the year.

PANICULATA GRANDIFLORA—If planted in rich soil and severely pruned every spring before the leaf buds open, will get to be very dense, dwarf clumps of compact form, wonderfully attractive when laden with their massive white plumes. Large beds kept at a uniform development, are extremely showy, first snowy white, then pink, then reddish-bronze and green. August till autumn. 2-3 ft., 75c.

FLOWERING PLUM

PRUNUS TRILOBA—A showy and interesting shrub, bearing in the spring, on its long slender branches a wealth of large pink double flowers. One of the finest spring blooming shrubs. Useful in the border or as a lawn specimen. Grows 5 feet high. 3-4 ft., 75c.

LILAC

Lilacs are the best known and most loved of any shrubs in cultivation. You will find them growing on almost every farm and they are so hardy that you will find them still living in the drought-stricken prairies after every other shrub and tree has succumbed. But you do not know how lovely lilacs can be unless you have grown some of the French Hybrids. They come in nearly all colors, bloom while very young and will last a lifetime.

SOUV. DE LUDWIG. SPAETH—Single. Red. Although one of the oldest of the improved Lilacs still it is one of the very best Lilacs grown. It seems impossible to get a red that has so many good, and so few bad qualities as Ludwig Spaeth. Panicles long and held erect well out from the foliage. Color a brilliant intense rich purple-red, that holds up well in the sun and lasts a long time. Bush large and very profuse bloomer. A wonderful Lilac. 2-3 ft., \$1.00; 3-4 ft., \$1.50.

ALPHONSE LAVALLEE—D. Blue. Tall, robust growing; makes a very shapely bush. Panicles long, broad, shapely, and compact. Opens an intense blue, but as the florets develop it changes to a beautiful shade of lavender. Splendid sort. 2-3 ft., \$1.00.

BELLE DE NANCY—D. Large, satiny rose, showing white towards the center. General color effect deep pink. One of the best pinks among the older varieties. 2-3 ft., \$1.00; 3-4 ft., \$1.50.

CHARLES JOLY—Double. Purple-red. One of the very best of the double dark reds. Bush medium both in size and height, limbs growing very upright. Rather large blooms, held erect well above the foliage; very striking. 2-3 ft., \$1.00; 3-4 ft., \$1.50.

PRESIDENT GREVY—Double. Light blue. Immense panicles; very double and symmetrical. A clear, soft, delicate blue. President Grevy is one of the older sorts and still one of the most desirable. 2-3 ft., \$1.00; 3-4 ft., \$1.50.

MME. LEMOINE—Double. One of the best of the double whites; a pure snow-white without tinge of cream. Foliage dark green. Panicles large, long, erect; large individual florets. 2-3 ft., \$1.00; 3-4 ft., \$1.50.

PRESIDENT LINCOLN—A new single blue Lilac that is now showing up very fine. It is an American Lilac by Dunbar—and is a rich clear blue. This is the blue Lilac which stood out so conspicuously in the great Lilac collection of Col. Plum as a real advance in blue Lilacs. A real blue. 5-6 ft., \$4.00.

PERSIAN—Fine leaved, fine twigged variety. Does not sucker like common lilacs. Great masses of delicate purple blooms. 2-3 ft., 30c; 3-4 ft., 50c; 4-5 ft., 75c.

COMMON PURPLE—Is perfectly hardy, makes a dense growth, flowers fragrant. Often used for hedges and screens.

	Each	10	100
2-3 ft.	\$.40	\$3.50	\$30.00

OLIVE

RUSSIAN—10 to 12 feet. Its foliage is of a remarkable silver hue, showing up in striking contrast to the green of other shrubs and trees. Has fragrant yellow flowers. Very hardy. 2-3 ft., 25c each; 3-4 ft., 50c; 4-5 ft., 75c.

POTENTILLA

CINQUEFOIL—Blooms all summer and being of a dwarf habit, is suitable for outside border plantings. Flowers are bright yellow. 18-24 inch, 35c.

SNOWBERRY

A valuable shrub in group plantings. Conspicuous on account of the masses of snow white berries produced in September and remaining on the bushes into the winter months. Height 4 to 5 feet. Pink flowers in July. 2-3 ft., 40c.

SPIREA

All the Spireas bloom with a riotous extravagance; style, color and habits of growth differing so markedly that a collection of varieties will insure blooms the entire season and still evade repetition.

ANTHONY WATERER—Brilliant rosy carmine flowers. Blooms all summer. Always blooms the first season. Is very useful for planting in front of larger shrubs. Grows 2 feet high. 12-18 inch, 35c; 18-24 inch, 50c; 2-3 ft., 75c.

ARGUTA, SNOW GARLAND—The earliest spirea to bloom, the bush becoming a mass of snowy garlands before the leaves appear. Grows 4 to 5 feet high. 2-3 ft., 40c each; 3-4 ft., 50c.

FROBELL—2 to 3 feet. A low bushy shrub of the Anthony Waterer type but more sturdy in habit. Canes distinctly reddish; young foliage tinged red. Flowers rose color. Brilliantly colored in autumn. 12-18 inch, 35c; 18-24 inch, 50c; 2-3 ft., 65c.

THUNBERGI—3 to 4 feet. Slender, arching branches, and fine, feathery, light green foliage. White bloom in early spring. One of the most graceful of the small shrubs. 2-3 ft., 35c; 3-4 ft., 50c.

KOREAN—Similar to Bridal Wreath but blooms a week later. A graceful shrub, useful in shrub borders and massing. 3-4 ft., 50c.

VAN HOUTTEI—BRIDAL WREATH—This wonderful fountain of bloom has been more extensively planted than any other shrub. It has undoubtedly been overplanted in foundation plantings but there is nothing else quite so good for a medium height screen or background planting, for partial shade or for lawn specimens.

	Each	12	100
2-3 ft., 3 year	\$.35	\$3.50	\$30.00
3-4 ft., 3 or 4 year....	.50	5.00	40.00
Large landscape size, 4-5 ft.75	7.00	

BILLARDI—Tall, erect shrub with canes terminated by feathery plumes. 5 to 6 inches long, of dainty pink color. 3-4 ft., 50c.

SYRINGA OR MOCK ORANGE

GRANDIFLORA—This is the hardiest and grows into the largest bush of all the Mock Oranges. Grows to 12 feet high. Covered with great white blooms. 3-4 ft., 50c; 4-5 ft., 75c; 5-6 ft., \$1.00.

LEMOINE—A dwarf variety, showy, and free blooming with slender branches. Flowers creamy white and very fragrant. 2-3 ft., 40c; 3-4 ft., 60c.

CORONARIUS—The old fashioned "Sweet Syringa" with fragrant white flowers. The long branches covered with a profusion of starry white flowers are exceedingly beautiful; blooms in early spring. Suitable for massing with other shrubs or planting as specimens. 2-3 ft., 35c; 3-4 ft., 50c.

VIRGINALIS

One of the most beautiful, new, ever-blooming varieties. This new Philadelphus which is being used so much in hedge planting also makes a wonderful individual specimen plant for the lawns. A vigorous, tall-growing plant with very large, double crested flowers with round petals. Pure white, sweetly scented; clusters of five to seven. The bushes nearly always bloom in the first year. 2-3 ft., 75c; 3-4 ft., \$1.00.

RED LEAF PLUM

NEWPORT—The best red leaved tree for the north. A very desirable shrub or small tree to use where red foliage effect is desired. The red color is held throughout the season. 4-5 ft., 75c; 5-6 ft., \$1.00.

NINEBARK

DWARF—One of the newer shrubs and is very desirable as a low massing shrub and makes a hardy dense hedge of low to medium height. 18-24 inch, 40c; 2-3 ft., 50c; 3-4 ft., 60c.

TAMARIX

HISPIDA—A very hardy Tamarix and a great improvement over other varieties. It grows 10 to 12 feet tall if not pruned, but it can be kept down to any desired height. Grows in sun or shade and in wet or dry locations. The foliage is very fine, feathery, and dense, and is of a silvery-blue color. Bright coral-pink flowers appear almost regularly all summer long. 3-4 ft., 50c; 4-5 ft., 75c.

EUONYMUS

AMERICAN BURNING BUSH—Bright yellow flowers in Spring, followed by clusters of brilliant red berries, which hang till mid-Winter. Leaves turn to beautiful crimson-scarlet in the Fall. 4-5 ft., 75c; 5-6 ft., \$1.00.

VIBURNUM

ARROWWOOD—8-10 feet. An attractive shrub with peculiar dentate leaves, bright green foliage turning to rich purple and red in the fall. White flowers followed by small blue-black berries that are relished by the birds. Does well in shade. 2-3 ft., 40c each; 3-4 ft., 60c; 5-6 ft., \$1.00.

COMMON SNOWBALL—Handsome white flowers are produced in great globular clusters. Has long been one of the most popular and showy varieties on our lists. 2-3 ft., 50c; 3-4 ft., 75c.

WAYFARING BIRD BUSH—Its soft, heavy foliage is of dark, grayish green; the clusters of white flowers in June are followed by red fruit turning black as it ripens, and which the birds strip until they are gone. Stands hot, dry weather and grows 10 to 12 feet high. 3-4 ft., 40c; 4-5 ft., 60c.

SNOWBALL BUSH

Purchased from Cutting's Nursery Nineteen Years Ago

HIGH BUSH— CRANBERRY

One of the best shrubs for ornamental planting. Extremely hardy. The white flowers of early summer are followed by brilliant red, edible berries that resemble cranberries. Leaves are large, with a vivid fall coloration. 3-4 ft., 60c; 4-5 ft., \$1.00.

HARDY ROSE BUSHES

Harrison's Yellow—Is perhaps the best known and most common June bloomer. 5 to 6 feet tall, it is a perfect mass of bright yellow, double roses, 1 to 2 inches across, for several weeks in June.

F. J. Grootendorst—A new hybrid with true Rugosa foliage and bright crimson lacinated flowers. Blooms almost continually. Compact, bushy growth.

Hansa—A large, double, deep red Rose of pleasing fragrance. Foliage rich dark green. Bush is very hardy and is a splendid ornamental shrub.

Belle Poitevine—Is a sturdy, strong growing pink rugosa hybrid perpetual, bearing large bright, pink, very double flowers.

Rosa Blanda—One of the extremely fine shrub roses. This makes a shrub 3 to 5 feet tall, is spreading, very hardy, filled with pink flowers in the spring followed by red berries that make it very attractive during the winter months. You need these to liven up your landscape.

Rubrifolia—Quite unique and conspicuous for its high-colored, reddish purple leaves. Deep pink flowers; scarlet fruits.

Hugonis—The long, arching branches are closely set with lovely single flowers very early in the season, sometimes before June 1st in this latitude. The blooms are approximately 1½ inches across and of clear bright yellow which does not fade to white. Strong 2 year bushes of above varieties, 75c each, 6 for \$3.75; heavy 3-4 ft., \$1.00.

Replace Agreement Any evergreens that do not live through the first summer will be replaced at one-half price. All other trees, shrubs or perennial plants that do not live through the first summer will be replaced free of charge.

CLIMBING VINES

Bittersweet— A native climber with handsome, glossy foliage and large clusters of beautiful orange-crimson berries. 50c each; extra heavy, 75c.

Clematis Jackmanni— The most beautiful and showy Clematis with deep velvety purple flowers. Strong potted plants, ready to bloom. 75c each.

Engelman's Ivy— The hardy vine which clings to brick, stone or stucco. Foliage turns to brilliant red color in fall. 2 year vines, 35c; 3 year vines, 50c.

Scarlet Trumpet— Honeysuckle— We consider this the most satisfactory climber where you want both shade and showy bloom. Brilliant yellow throated scarlet flowers nearly all summer. Strong 2 year plants, 50c each.

Boston Ivy— Small glossy leaves and slender stems which cling closely to walls. 2 year vines, 75c.

Climbing Roses— Crimson Rambler and Paul's Scarlet Climber—2 year, \$1.00 each.

Heckrottii— Honeysuckle — Summer King — Gold Flame — A wonderful new honeysuckle that naturally grows as a vine but by careful trimming can also be easily grown as a shrub 2 to 5 feet in height as desired. It is covered with hundreds of fragrant flowers, flame-scarlet outside and golden-yellow inside. Fine for porch, arbor, trellis, fence and ground cover. It is perfectly hardy, easy to grow; succeeds everywhere. Last summer our Heckrottii vines in the nursery had blooms constantly from the first of June to November. Our strong No. 1 plants will bloom this summer. Each 75c; smaller plants, 50c.

HEDGES

The popularity of hedges is increasing. Persons are more and more desirous of having privacy on their home grounds. There are, necessarily, many sorts of hedges—the excluding, thorny hedge grown for a needed purpose; the low bordering hedge for dividing the formal garden; the boundary hedge which merely indicates how far the lot extends; the tall background hedge to shut out unfavorable views; the windbreak hedge as a protection for the home or farm yard—all these hedges to serve a useful purpose or to embellish a garden area.

The following varieties are all hardy and dependable for Minnesota and are the only varieties that are giving satisfactory results here.

ALPINE CURRANT

Absolutely hardy, free from disease and insect pests, bright green foliage which remains on the plants until late in fall. Grows very bushy and is best variety for ornamental hedge from one to three feet in height. Plant fifteen inches apart.

	10	100
12-18 inch	\$3.50	\$30.00
18-24 inch	4.50	40.00

BUCKTHORN

This not only makes a very ornamental hedge but is the best variety for protection as the branches are stiff and makes a stout hedge of any height from two to 10 feet. Our plants have been transplanted and twice cut back, making them much superior to the seedling plants sold by some nurseries at a lower price. Plant 12 inches apart.

	10	100
18-24 inch transplants.....	\$1.50	\$12.00
2-3 feet transplants.....	2.00	16.00
3-4 feet transplants.....	2.25	20.00

HONEYSUCKLE

TATARIAN PINK—Sometimes used as a sheared hedge, 4 to 6 feet high, but is unexcelled for a tall screen or border, growing 10 to 15 feet high. 2-3 ft., \$4.00 per 12; \$35.00 per 100; 3-4 ft., \$6.00 per 12; \$50.00 per 100.

THUNBERG'S BARBERRY

A graceful shrub becoming very beautiful in fall with its yellow and red leaves and red berries. Its dense growth and sharp briars make it a good hedge plant for protection from trespassers. Plant 12 or 18 inches apart.

	10	100
12-18 transplants	\$2.50	\$20.00
18-24 transplants, heavy	3.50	30.00

SPIREA VAN HOUTTI

Often used as a sheared hedge but is especially adapted for use as a screen or snowbreak, planting them from 2 to 4 feet apart and allowing them to grow to their natural height of six or seven feet. 2-3 ft., \$3.50 per 12; \$30.00 per 100.

Deciduous Trees

Add beauty, comfort and value

ASH, American—This splendid tree is becoming recognized as one of our best shade trees and is being more extensively planted each year. It is clean, symmetrical, drought resistant, and long lived. For shade or for boulevard planting American Ash will please you. 8-10 ft., \$1.50; 10-12 ft., \$2.00; 1½-2 inch cal. \$3.00.

AMERICAN WHITE BIRCH—The White Birch is a medium sized tree native in Minnesota. The bark is particularly interesting and attractive when planted near evergreens and red barked shrubs. 5-6 ft., \$1.25; 6-8 ft., \$1.75; 8-10 ft., \$2.25.

CUT-LEAF WEEPING BIRCH — You simply couldn't find a more beautiful or graceful tree than this weeping Birch, with white bark, long drooping branches, and tiny finely cut leaves. It is effective when used in groups of two or three. Grows to about 40 to 60 feet. 5-6 ft., \$2.00; 6-8 ft., \$3.00; 10-12 ft., \$6.00.

AMERICAN ELM—A magnificent tree, growing 60 to 80 feet high, with drooping, spreading branches, one of the grandest of our native trees, makes a beautiful lawn or boulevard tree. The prices are for well shaped specimen trees. The measurement in inches means the diameter of the tree just above the ground. 5-6 ft., 50c; 6-8 ft., 75c; 8-10 ft., \$1.50; 10-12 ft., \$2.00; 2-2¼ inch, \$3.00; 2¼-2½ inch, \$4.00.

LAKE CITY ELM—The original specimen of this variety was found growing in Lake City, Minnesota. It is a type of American Elm of unusual merit. Close, upright growth, insuring it against breaking down from sleet and storm and makes trimming unnecessary. Trees are all symmetrical and uniform in shape, yet with sufficient spread to make it a valuable shade tree. It is especially adapted for boulevard planting as it does not have low spreading branches to interfere with travel on the sidewalk and pavement. 8-10 ft. trees, \$2.00; 1½-2 inch, \$3.00; 2-2¼ inch, \$4.00.

MOUNTAIN ASH:

RED BERRIED—One of the most ornamental trees you can possibly plant. The foliage is a beautiful green. Light, smooth bark, a broad head very compact, with gorgeous creamy white blossoms in the spring, followed by the many, many clusters of scarlet and carmine berries in the late summer and fall. It grows very rapidly and attains a height of about 30 to 40 feet. 5-6 ft., \$1.00; 6-8 ft., \$2.00; 8-10 ft., \$3.00.

NORWAY POPLAR—If you want the fastest growing tree, either for shade or windbreaks, my 35 years of growing this tree has convinced me that this is the one to plant. I have grown them 12 feet high in two years from the cutting and have often seen them on rich soil grow an inch in diameter per year, making a 12 inch trunk in 12 years. The tree is perfectly hardy, and is seldom injured by wind or ice. Of course they get too large for a small yard before many years but it takes only a few hours to remove a 20 year old tree. 3-4 ft., \$8.00 per 100. Transplanted trees, 6-8 ft., \$1.00 each; 8-10 ft., \$2.00.

MAPLE, Silver or Soft—A good appearance and rapid growth make this tree very popular where an immediate effect is required. 6-8 ft., 75c; 8-10 ft., \$1.50; 10-12 ft., \$2.50.

LAKE CITY ELM

VIGORO IS IDEAL FOR LAWNS, FLOWERS, SHRUBS, TREES, VEGETABLES!

MAPLE, Hard or Sugar—This is one of the most beautiful of shade or boulevard trees. It is stately in all seasons, but truly gorgeous in fall when its dense leaves are brilliant yellow, orange and scarlet. For beauty and permanence Hard Maple cannot be surpassed. 6-8 ft., \$1.50; 8-10 ft., \$3.00; 2-2½ inch, \$6.00.

MAPLE, Norway—Well liked for its pleasing and familiar symmetrical dome-shaped head. Its dense leaves are rich green in color and hold on the tree fully two weeks longer in the fall than those of other Maples. One of the best for lawn or boulevard planting where good form and shape are needed. 5-6 ft., \$1.25; 6-7 ft., \$1.50; 7-8 ft., \$2.50.

SCHWEDLER'S MAPLE—Brilliant purplish red leaves in spring make a rich contrast with the green of other trees; gradually the highly colored leaves soften to bronze, then later to waxy green. A magnificent lawn tree. 7-8 ft., \$3.00; 8-10 ft., \$5.00.

POPLAR, Bolleana—This rapid growing, tall, slender tree is used when accent trees are needed. The leaves are shimmering rich green and show their whitish under sides when turned by the breezes. The bark is grey-green and shows up well in winter. 6-8 ft., \$1.00; 8-10 ft., \$1.50; 10-12 ft., \$2.00.

HACKBERRY—Hackberry is one of the fine trees for shade or boulevard planting. It grows quite rapidly, to a uniform shape. It is extremely hardy and develops strong crotches. An interesting tree as a specimen or in a background planting. 6-8 ft., \$1.50; 8-10 ft., \$2.50.

LOMBARDY POPLAR—This is the Poplar that is so much used for avenue or background planting. They form tall stately columns of dark, shiny-green leaves. It succeeds on soil too poor for other trees, and grows rapidly. Widely used for screening and windbreak purposes because the foliage grows close to the ground. 6-8 ft., \$1.00; 8-10 ft., \$1.50; 10-12 ft., \$2.50.

AMERICAN RED BUD—We have been growing a few Red Buds for quite a number of years and although it is not entirely hardy, it is such a beautiful tree, both in bloom and in foliage, that it is worth planting by those who enjoy growing the unusual things. Leaves are heart shaped and glossy green, and the red flowers appear before the leaves and literally cover the branches. 4-5 ft., \$1.50.

NIOBE WEeping WILLOW—The golden Weeping Willow, the most beautiful in that species. Splendid as a lawn tree, for planting near pools or along the banks of streams. A graceful weeping tree with deep rich golden bark on trunk and along the long slender weeping branches. Hardest of all the Weeping Willows. Very beautiful in the winter because of its rich yellow bark, which makes it very conspicuous. Absolutely hardy here in Minnesota. 5-6 ft., \$1.00; 6-8 ft., \$1.50; 8-10 ft., \$2.00.

CORKSCREW WILLOW—A beautiful but odd looking tree that comes to us from the Department of Agriculture at Washington. An upright willow which grows much like a Lombardy Poplar with every limb twisting and turning as it grow upwards much after the fashion of a corkscrew. Might be termed the Corkscrew Willow. 8-10 ft., \$1.50.

Windbreak Trees

WHITE SPRUCE

EVERGREENS

Prices Include Digging Evergreens
with Ball and Burlap.

American Arborvitae— The habit is erect, and pyramidal, the foliage soft and light green in color. This Arborvitae should be included in groups and all evergreen plantings. They are unequalled as tall hedges to form screens for unsightly objects or for shelter belts or as a blind about clothes yards, etc. They grow quickly and if planted closely in hedges give the desired effects promptly. They may be kept at any height and made more dense and bushy by trimming, which they endure readily. 18-24 inch, \$1.50; 2-3 ft., \$2.50.

Pyramidal Arbor Vitae— This variety is perfectly pyramidal in shape, spreading very little at the base and retaining the shape without shearing. The color is rich deep green. Useful for entrance and corner plantings. 18-24 inch, \$2.00; 2-3 ft., \$3.50; 3-4 ft., \$5.00.

Siberian Arbor Vitae— Grows very compact and forms a broad, dense, bushy tree. Stands shearing well. 12-18 inch, \$1.50; 18-24 inch, \$2.50.

JUNIPERS

Juniperus Virginiana— (RED CEDAR)
—This tree is valuable for group plantings as well as for specimen trees. One of the hardiest varieties and stands shearing well. 18-24 inch, \$2.00; 2-3 ft., \$3.00; 3-4 ft., \$4.50; 4-5 ft., \$6.00.

Juniper, Hill Dundee— This outstanding Juniper is upright growing, is bluish-gray in the spring and summer and changes to a plum-like color in the fall and winter. To create new interest in your evergreen planting you should include this most excellent new Juniper. 2-3 ft., \$4.00; 3-4 ft., \$7.00.

Juniper, Andora— One of the finest spreading Junipers of recent introduction. Grows closer to the ground than the Pfitzer. During summer it has a silver reflex to the otherwise green foliage, in winter it turns purplish cast, which is unusual in evergreens. 12-18 inch, \$1.50; 18-24 inch, \$2.50; 2-3 ft., \$4.00.

Juniper, Pfitzer's— This is the most popular of all the spreading types. Its habit of growth, its pendulous branches and attractive foliage is strikingly beautiful. The branches are horizontally spreading and the terminals slightly drooping. It lays close to the ground and for larger edging plantings there is nothing superior. Flowing lines are especially valuable in landscape planting and this Juniper seems to fill this requirement better than any other. The foliage is a gray green both summer and winter and because of its ability to withstand the soot and dust of cities will thrive where others fail. 12-18 inch, \$1.50; 18-24 inch, \$3.00; 2-3 ft., \$4.00.

Juniper, Savin— Handsome, moss green foliage; main branches protruding from the crown at a 45 degree angle; a fine dwarf ground cover, or filler, in evergreen groups, very hardy and suited to most all soils. 12-18 inch, \$1.50; 18-24 inch, \$3.00; 2-3 ft., \$4.00.

DWARF YEW

A hardy, dwarf, slow-growing evergreen. Foliage is very heavy and of a waxy, shiny green color. Will thrive in dense shade. 12-18 inch, \$2.00.

*Home of Dr. and Mrs. A. B. Rivers
10th Ave. S.W., Rochester*

This group of evergreens was planted to soften the severe lines of the house and to reduce its apparent height which was accentuated by the sloping ground.

PINES

Pine, Mugho— This is an excellent dwarf pine, being globe shaped and erect branching. It is very attractive, especially in spring, when the new growth which seems like miniature candles completely covers the bush. 12-18 inches wide, \$3.00; 18-24 inches wide, \$5.50; 24-30 inches wide, \$7.00.

Austrian Pine— From Central Europe. Leaves or needles stiff and dark green, hardy everywhere and one of the most valuable conifers for specimen trees or windbreaks, etc. 3-4 ft., \$4.00.

Scotch Pine— A rapid grower, very hardy from central portion of Europe, with short, rigid, light green leaves, very valuable for masses, specimens and screens. 3-4 ft., \$4.00.

SPRUCE

Blue Spruce— The queen of the spruce family; the color is a beautiful blue, which holds well all through the year; this is one of the most valuable of ornamental evergreens. 1-2 ft., \$3.00; 2-3 ft., \$5.00; 3-4 ft., \$7.00.

Black Hills Spruce— A compact, shapely tree of a dark green color. It will endure cold and dry weather and consequently thrives under most trying conditions. It transplants very easily and because of its dense, sturdy growth, it makes beautiful foundation planting. 2-3 ft., \$2.50; 3-4 ft., \$4.00.

Norway Spruce— The most generally used of evergreen trees. Useful for screens and windbreaks on account of its rapid growth. A tall tree of pyramidal, symmetrical growth. Selected trees. 18-24 inch, 60c; 2-3 ft., \$1.00; 3-4 ft., \$1.50.

WHITE SPRUCE

Makes a compact and upright growth. Grows nearly as fast as the Norway Spruce and is more compact. One of the most reliable windbreak trees, being hardy and long-lived. 18-24 in., \$1.50; 2-3 ft., \$2.00; 3-4 ft., \$4.00.

FIR

Douglas Fir— This is a fine ornamental evergreen of graceful proportions, good color, rapid growth and extreme hardiness. It makes a large tree and should be planted where it will have plenty of room. Should be included in a mass planting of evergreens. 2-3 ft., \$1.50; 3-4 ft., \$2.50; 4-5 ft., \$4.00.

WE DO NOT SHIP EVERGREENS

On account of the excessive cost of packing evergreens for shipment, and the shortage of expert help for such work, we cannot ship any evergreens.

You may call for them at the nursery, or we will deliver them at your home in Rochester.

APPLES

PRICES OF APPLE TREES

	each	5	10
5-7 ft.	\$1.40	\$6.50	\$12.50

Tetofsky— The first apple to ripen. Tetofsky is not only an eating apple of finest quality, but is excellent for sauce and canning.

Yellow Transparent— Ripens about August 1st. Flesh juicy, tender and of fine flavor.

Duchess— A vigorous growing, hardy tree and heavy bearer. Fruit is large, greenish yellow, striped with red. The standard early apple for the Northwest.

BEACON

The new Beacon is a fall apple ripening with or a few days later than Duchess, and will keep for a month after harvest even without cold storage facilities. It is a highly colored, all-red variety—better eating than Duchess and is an excellent cooking apple. The tree is vigorous, productive, and very hardy. The early season, the uniform size and shape, the high color and quality, together with the keeping and handling quality, so different from most early apples, make Beacon the outstanding early apple for home or for market.

Prairie Spy— Prairie Spy is a big red apple with some green on it. An apple of the finest quality that will keep through the winter in an ordinary cellar. The tree is hardy here, a heavy bearer, and should be included in every home orchard and is undoubtedly one of the best varieties for the commercial orchard.

Northwestern Greening— Fruit very large, and handsome; turning yellow as it matures. This apple is in good demand as a cooking apple in late winter and spring. A good commercial variety in the southeast third of Minnesota. Season, December to March.

Whitney— A large, red, mild flavored Crab, excellent for eating, canning, and pickles. Perfectly hardy, never blights and is a heavy cropper.

Wealthy— The leading commercial variety for fall. In any orchard in this part of the country you will find Wealthy as the main variety. It is a great bearer, excellent for eating fresh or cooking. Fine grained and juicy. Ripens in September and is the best known and best liked of the fall varieties.

Haralson— Its size, shape and color are just right for an ideal commercial apple. The tree is extremely vigorous, productive and hardy. The branches spring at wide angles from the central trunk and are very strong in the crotches. The fruit will keep in an ordinary cellar throughout the winter without artificial refrigeration. An early, heavy bearer. The fruit hangs well to the tree until matured, is a deep red and the flesh is firm. Is a leading market variety and keeps all winter. Is an all purpose apple and is unexcelled for pies.

McIntosh— Fruit above medium size, yellow covered with crimson, flesh snow white, crisp, very tender, aromatic and sub-acid. October to January.

Malinda— One of the hardiest, heaviest bearing, longest keeping apples that can be grown here. The flesh is yellowish-white, firm, juicy, and with a sweet after-taste.

Dolgo— Fruit is oblong, of real beauty and peculiar lemon-acid in flavor. Entirely different from any other crab apple and far superior for jellies, producing a transparent bright red jelly of high quality. The fruit is distinctly beautiful, borne in great profusion. Dolgo is a beautiful lawn tree, in addition to producing fruit of superior quality. It is a striking thing to see the masses of red fruit clustered along the branches.

PRICES OF ALL APPLE TREES

	each	5	10
5-7 ft.	\$1.40	\$6.50	\$12.50

New "Minjon" Apple

A MINNESOTA JONATHAN, so hardy it thrives and produces far North. Bears abundantly and regularly—heavy loads of brilliant all-red apples. Ripens with Wealthy, but colors better, hangs to tree better.

New Fireside

A MINNESOTA DELICIOUS that's hardy for the North! Truly a triumph of fruit breeding. Flavor and texture even better than Delicious, although fruit is not so highly colored. Fireside is a large, long keeping winter apple with the finest flavor produced at Minnesota's Fruit Farm. Flesh is crisp, sweet, juicy.

MINJON AND FIRESIDE, 4 to 5 ft., \$1.50 each; 3 or more at \$1.40 each.

PLUMS

The choice list of Mammoth Plums described below are considered the cream of the list. Our recommendation is to plant the full assortment as each one has a different season—each a different flavor. You will find them all excellent. A Pollinizer Plum should be included in every group.

SUPERIOR

One of the very largest and very best of the Jumbo Plums originated by the Minnesota State Fruit Breeding Farm. The tree bears early and is a regular and heavy cropper. The fruit is very large, firm fleshed, beautiful red color and delicious quality to eat out of hand. Superior is one of the better Plums for home or for market.

EMBER

Without doubt the best late Plum. It is well described by Prof. W. H. Alderman, Chief, Division of Horticulture, U. of M., who writes: "Ember is a late Plum of good size and has exceptionally fine dessert and canning qualities. It is yellow with attractive red blush. It has two valuable and outstanding characteristics; it hangs to the tree tenaciously even at full maturity, and after picking will keep in good condition for two or three weeks."

This late Plum, together with the earlier varieties mentioned, make a splendid assortment for the home or for market.

UNDERWOOD

The Underwood is valuable because of its large, early fruit and annual bearing. It is the earliest of the large Plums, attaining a size of 1 1/4 inches in diameter. Fruit is attractive red with splendid quality, small pit.

KAGA

"The Apricot Flavored Plum"

A deliciously flavored plum, fragrantly appetizing. Medium size, heavy producer, and bears in ONE YEAR after planting. Hardy like all of Hansen's hardy introductions. The flavor of this plum is the nearest to an apricot you could find.

POLLINIZER VARIETIES

Are essential for success in raising plums. Be sure to include some Kaga Plums in every group of plums. If you now have a group of plums not fruiting well, you should add some Kaga Plums to this group this spring.

PRICE OF PLUM TREES

1 EMBER		
1 UNDERWOOD		
1 KAGA		

CHERRIES

The hybrid Minnesota Cherry, which is a cross between a plum and cherry, has the flavor of the cherry and is hardy like the native plum, and the birds do not bother them. They are heavy yielders and are excellent for canning.

Oka— A very compact vigorous growing tree. It is a heavy yielder, producing bright red fruits of medium size. Tree is somewhat dwarf and can be planted closer together than most fruit trees.

Sapa— A very heavy yielder. Fruit is large, red, with dark red flesh. One of Professor Hansen's most popular introductions. Oka and Sapa trees, 5-6 ft., \$1.50; 2 for \$2.80.

New Nanking Cherries— Originated by the Minnesota Fruit Breeding Farm. Especially selected and bred for the excellence and abundance of their fruit, as well as for their beauty as ornamental shrubs. 3-4 ft., \$1.00 each.

Mail Orders

If not convenient for you to come to the nursery we will be glad to receive your mail orders. Strawberries, raspberries and perennials will be sent by parcel post, prepaid, at prices quoted. Other stock will be sent by freight or express, purchaser to pay charges. Nursery is located on paved highway, U. S. 14, eight miles west of Rochester.

STRAWBERRIES

PRICES OF CUTTING'S CERTIFIED STRAWBERRY PLANTS

Senator Dunlap, Premier, Warfield, Beaver.

25 for 90c; 50 for \$1.50; 100 for \$2.50.

Gem Everbearing. 25 for \$1.00; 50 for \$1.75; 100 for \$3.50.

Strawberry Plants and Berry Bushes
Will Be Sent Postpaid

Carrie Gooseberries—

We have tested most varieties of gooseberries and have never found any to equal the Carrie in productiveness, hardiness and regular bearing. It seldom fails to produce a crop the second year after planting and every year thereafter. Fruit is of good size and very easy to pick as bushes are nearly free of thorns. You need a few gooseberry bushes for sauce, pies and conserve. 2 year plants, 40c each; 3 for \$1.10.

Rhubarb—

MAC DONALD

MacDonald is very highly colored, attractive, red stalk, of large size, productive, very tender and succulent, and of excellent quality, and particularly valuable for pies and desserts. Its color, when cooked without peeling is as attractive as that of the raspberries. Price, strong divisions, 60c; 3 for \$1.50.

NEW CHIPMAN'S CANADA RED

One of the best of the new improved varieties. Very sweet, tender, of fine flavor, with extra-large stalks, bright red all the way through, the red color extending even to the mid-rib of the leaf. Does not lose its bright color in cooking, and both sauce and pies are an appetizing cherry-red color. Chipman's is vigorous in growth, of the hardy, everbearing type, and does not make seed. Supply of roots limited. Price, \$1.10 each; 2 for 2.00.

NEW RUBY RHUBARB

A new intensely red rhubarb originated in Canada. Even the inside of stalk is red. Makes delicious rhubarb sauce. Price: Strong roots, 60c each; 3 for \$1.50.

Red Lake Currants—

The berry is very large and is borne on long stems forming exceptionally long well filled bunches. The quality of fruit is very good, the ripening season is medium and the plant a heavy yielder. While this new variety produces large berries in long bunches, its most valuable quality is the sturdy upright type of bush. This character is lacking in many of the older varieties. Because of the above qualities, Red Lake is undoubtedly going to be the leading currant. 2 year plants, 50c each; 3 for \$1.25.

Grapes—

BETA

A heavy, annual bearer, hardy as the wild grape. Medium size black fruit of extra good quality for juice and jelly, and ripens so early that it can be grown far north. The Beta withstands our severe northern winters without protection. They may be grown on fences, over a building, or in a windmill tower and should bear heavily every year. 2 year vine, 40c; 6 for \$2.00.

FREDONIA

The new outstanding, early black Grape. Fredonia is the earliest good black Grape. The vine is vigorous and productive and ripens its fruit 3 weeks earlier than Concord. Fruit is large, sweet, and of good quality. 2 year vines, 40c; 6 for 2.00.

WORDEN

A large, sweet and fine flavored grape. A fine dessert grape but needs winter protection. 2 year vines, 40c; 6 for \$2.00.

OUR GUARANTEE—

We guarantee our nursery stock to be true to name; if anything proves otherwise, we will replace it free with the genuine or refund the amount you paid for it.

CASH AND CARRY

We are always glad to have our customers come to the nursery and make their own selections. It does not usually take long to assemble your order and we can pack most any ordinary order so you can carry it on your car. Our working hours; 7 a.m., until dark.

Raspberries

EARLY SUNRISE

Without doubt the best early red raspberry for Minnesota. Berries are large and of fine flavor. Plants are heavy yielders, very hardy and disease resistant. No. 1 plants, 12 for \$1.50; 25 for \$2.75; 50 for \$5.00; 100 for \$9.50.

LATHAM

This is one of the outstanding productions of the Minnesota Fruit Breeding Farm and has become the most popular red raspberry in the Northern states. Ripens a week or more later than the Early Sunrise and is a large, bright red berry of good quality. Produces heavy crops and is very hardy. No. 1 plants, 12 for \$1.50; 25 for \$2.75; 50 for \$5.00; 100 for \$9.50.

CUMBERLAND BLACK

The most popular variety in Minnesota. Berries are large and firm, and bush is thrifty and productive. 2 year plants. 12 for \$1.50; 25 for \$2.75; 50 for \$5.00; 100 for \$9.50.

PEONIES

Price of strong Peony roots, 50c each; any six varieties for \$2.50.

COURONNE d'OR—Snow-white with yellow circle of stamens. Large blooms. Late. Excellent cut flower.

CLAIRE DUBOIS—Rich, satiny pink with silvery edge. Large flower. Tall and strong. Late.

SARAH BERNHARDT—Apple blossom pink silver-tipped. Mid-season. Fragrant.

FESTIVA MAXIMA—Early and very large. White, with center flaked crimson. Splendid in every way.

KARL ROSEFIELD—Rich, glowing crimson. Immense, solid flower. Superb variety. Mid-Season.

MARY BRAND—Deep red. Mid-season. One of the most satisfactory reds as a cut flower as it will last a week and hold right up stiff, if cut in the bud.

DAHLIAS

JANE COWL—A large flower of warm buff and old gold, blending to a bright salmon at the center.

JERRY'S BEACON—A huge round bloom, of Chinese scarlet and a paler reverse side giving it a two-tone effect. Plant is very vigorous.

WHITE KING—Pure white.

Price of Dahlia tubers, 35c each; 3 for \$1.00.

AVALON—Pure, clear yellow, with large flowers.

JERSEY BEAUTY—Undoubtedly the finest pink Dahlia in existence. A perfect bloom, carried high on wiry stem.

MRS. I. De ver WARNER—Lavender. Strong grower with long straight stems

PRIDE OF CALIFORNIA—Vivid red, very large, free flowering.

VIGORO, the Complete Plant Food, Supplies All Plants 11 Vital Elements!

HARDY PERENNIALS

Perennials are becoming more and more popular with the increase in gardening. No home grounds are now completely planted without a border of these continuously blooming plants. If you plan carefully you can have flowers all year. For your selection there is listed here a wide variety of those dependable, hardy plants, that once established, assure you of a succession of blossoms without the constant trouble of replanting. **Prices of perennials, except as noted: 25c each; 12 for \$2.50, Postpaid.** Strong field-grown plants that will bloom the first year.

FALL BLOOMING ASTERS

Plant these brilliant fall-blooming hardy Asters and prolong your blooming season a full month. Have your garden a place of dazzling splendor when all about is brown and sere. They will bring a world of color during late September, all of October, and on into November until heavy freezing kills the flowers. These plants stand our Minnesota winters unprotected.

ADORABLE—Best true pink hardy aster. Habit and growth are similar to Harrington Pink but color is slightly deeper salmon pink. 35c.

MOUNT EVEREST—The finest and best white aster. It forms very tall, well-shaped pointed pyramids with an abundance of lateral growths, which flower right down to the ground. Makes wonderful bouques as cut flowers. 35c.

BLUE GEM—Large lovely flowers of blue with a yellow center, best blue in cultivation. September until frost. 3 to 4 feet. 35c.

BEECHWOOD CHALLENGER—This variety is in our opinion the closest to red we have been able to come so far in Hardy Asters. It is free-flowering, of medium height, and brilliant crimson-red color. The flowers are freely produced. Planted together with Mount Everest, the contrast is striking. 35c.

COLUMBINE

Delicate flowers in many colors. Long spurred. June and July. 24 inches.

COREOPSIS

Large, brilliant yellow flowers. Stems long, graceful. Blooms all summer. 2 feet.

CORAL BELLS

Low-growing, tufted, plants which bear a profusion of dainty coral-red flowers on long, slender stems. Blooms nearly all summer.

CHRYSANTHEMUMS

BRONZE CUSHION—As the flowers first open they are warm rich red bronze, then turning to a bronzy yellow with a light red center giving a delightful effect. Later, lighten to a beautiful golden bronze shade.

PYGMY GOLD—Produces quantities of miniature blooms slightly over 1 inch across. Color is clear yellow, remarkable for its brilliance and intensity.

PINK CUSHION—Flowers open to a deep orchid pink, then change to a light orchid with a creamy center, finally salmon pink with a soft yellow center. Has a record of 3,000 flowers the first year. Very hardy.

SANTA CLAUS—Somewhat taller, but grows in broad mounds. Rich red; semi-double.

HARMONY—A harmony of wonderful bronze and yellow in combination.

Above Varieties, 35c each.

DELPHINUM

BELLADONNA—The freest and most continuous blooming of all, never being out of flowers from the end of June until cut down by hard frost. The clear turquoise-blue of its flowers is not equaled for delicacy and beauty by any other flower.

D. BELLAMOSA—A free-blooming, dark blue type.

BLACKMORE AND LANGDON STRAIN—A famous English strain. All the clear shades of blue, with bees of contrasting colors.

BLEEDING HEART

DIELYTRA SPECTABILIS—Blooms May to June. Height 2 feet. Flowers pink and white; heart-shaped.

D. EXIMIA—Plumy Bleeding Heart. Finely cut, fern-like foliage with showy rose-colored flowers. Blooms all summer. Stands partial shade. Height, 18 inches.

GYPSOPHILA

BRISTOL FAIRY—A double Baby Breath of great vigor, producing large panicles of flowers and blooming more or less continuously all summer, if first blooms are cut. 50c.

GAILLARDIA

Gay blooms with reddish-brown centers and yellow, daisy-like petals ringed with red. June to November. 18 to 24 inches. Fine for cutting.

LILIES

REGAL—The large, trumpet-shaped flowers are snowy white, with a pure yellow center, while the exterior of the petals is slightly tinged pink. It is a strong grower, attaining the height of three or four feet. The flowers are beautiful, possessing a delightful fragrance. Extra large bulbs, 25c; large, 20c.

ELEGANS—The fiery-red blooms of this lily are borne in large clusters on medium height, stocky stems. Blooms profusely in June and July and is very hardy. Large blooming size bulbs. 10c each; 6 for 50c.

DOUBLE TIGER—Five feet. Produces an abundance of orange-scarlet flowers in August. Very hardy and vigorous. Large bulbs. 10c each; 6 for 50c.

CORAL LILY—2 feet. The brilliant coral-red flowers are borne in clusters of 5-15 on slender stems. Fine for rock garden or border. Bulbs, 15c each.

LYTHRUM

PURPLE LOOSESTRIFE MORDENA. This is a new Lythrum brought out by the Canadian Experimental Farm at Morden, Manitoba. We think it the best of all the Lythrum and a great improvement over the old types. Long upright growing stems just covered their length with little deep bright rose-pink flowers. This is a good one. Showy plants for moist, shady borders, and watersides. A very useful cut flower, blooms nearly all summer. Blooming size plants, 25c; clumps, 50c.

PLATYCODON

BALLOON FLOWER—Large, showy, balloon-shaped buds which open to star-shaped flowers. Blue. June to September.

PYRETHRUM ROSEUM

PAINTED DAISY—Beautiful daisies of pink and red cover the plant in June. 2 feet.

HEMEROCALLIS

BAY STATE—Brilliant deep yellow.

J. A. CRAWFORD—Rich apricot-yellow.

LEMONA—Delicate lemon-yellow, one of the finest large blooms.

THE GEM—Rich, deep orange yellow. Very finely formed bloom.

(Prices of above plants, 50c each.)

SHASTA DAISY

ALASKA—In July and August bears a great profusion of immense, gleaming white blooms, excellent for cutting. 18-24 inch.

EARLY ELDER—Glistening white flowers in early June, making a beautiful display in the garden and especially fine for bouquets. 15 inches. Multiply rapidly and roots should be divided in August and reset.

DOUBLE—The pure white flowers are completely double and produced freely from June to October. They are of excellent lasting quality. The stems are about 18 inches high, very stiff, holding the heavy double pure white blooms upright. Excellent for the border as well as for cutting. 40c each.

PRICES OF PERENNIALS, unless noted otherwise, 25c each; \$2.50 per 12.

PERENNIAL PHLOX

Field grown plants, 25c each; 12 for \$2.50.

AFRICA—Brilliant carmine-red with a deep blood-red eye.

BRILLIANT—Large trusses of brilliant crimson flowers, darker eye.

BRIDESMAID—White, large crimson center.

ENCHANTRESS—A bright salmon-pink with a darker eye.

JULES SANDEAU—A dwarf free flowering salmon-pink.

SUBULATA (Creeping Phlox)—Blooms in May, when whole plant is a vivid mass of lavender-pink. Very bushy.

R. P. STRUTHERS—Tall. A bright rosy carmine with claret eye.

PAINTED LADY—Soft silvery shaded salmon, bright-red eye; large individual flowers; free-flowering.

RIJNSTROOM—Lively shade of Rose-pink, very large.

MARY LOUISE—A good grower of medium height with clean foliage. Produces pure glistening snow-white heads of unusually large size, the individual flowers being twice as large as other white varieties. 35c.

MRS. JENKINS—A medium tall, early blooming beautiful white.

GREENHOUSE PLANTS

OUR VEGETABLE and FLOWER PLANTS are grown from Vaughn's and Burpee's Seeds which are noted for their high quality and we know you will be pleased with them.

When it is time to set out plants in the vegetable garden, or the window boxes need to be filled, or you want some annual flowers for the flower border, remember that we have everything you need.

ASPARAGUS

A little space in the garden will grow all the asparagus you need. Plant the roots in deep rich soil, the crowns about four inches below the surface. Use plenty of manure and keep out the quack grass and a patch will last many years.

PARADISE

Produces a normal crop one year earlier than any other variety. Growers who have seen this Asparagus growing have been amazed to see the straight, crisp large stalks that were produced from plants set only the year before. An exceptionally strong, vigorous producer. Because it brings returns one year earlier than other varieties and because of its great size, large crop and fine, mild flavor, this NEW variety will quickly supersede all others on the market for home-garden use, commercial production and shippers.

Cutting's Reliable Lawn Seed

We mix our own lawn seed, using a formula developed as a result of experiments by the lawn specialists at Universtiy Farm, supplemented by our experience in making lawns in Minnesota.

Our mixture contains Kentucky Blue Grass, Red Top, Perennial Rye Grass and White Clover. Use one pound to 250 square feet. 1 lb., 45c; 5 lbs., 2.10; 10 lbs., 4.00.

Shady Place Mixture

This is a special mixture of the varieties of grass seed that do well in the shade. By planting this seed, then using fertilizer and water to replace that removed by the trees, you can grow a good lawn in the shade. 1 lb., 50c; 10 lbs., \$5.00.

Berry Boxes and Crates

The Ewald Folding Berry Box is the most convenient box to use as they require only a little space for storing and are quickly set up when you want to use them.

We cannot guarantee these prices after our present stock is exhausted.

125 quart boxes, packed in one 16 qt. crate	\$ 1.50
500 quart boxes, packed in four 16 qt. crates	5.60
1000 quart boxes, packed in eight 16 qt. crates	10.60
200 pint boxes, packed in one 16 qt. crate	2.25
1000 pint boxes, packed in five 16 qt. crates	9.60

VIGORO
Complete plant food

For lawn, flowers, small fruits and the vegetable garden Vigoro is the ideal fertilizer. Apply it to the lawn in early spring and watch the grass turn green and grow luxuriously. It improves both the quality and quantity of all kinds of flowers, both annual and perennial and will add greatly to the quality and the production of your vegetables, small fruits and ornamental shrubs.

Vigoro contains all the 11 elements needed for proper plant nourishment. Use 4 lbs. to 100 Sq. Ft. 100 lbs., \$4.00; 50 lbs., \$2.50; 25 lbs., \$1.25; 10 lbs., 85c.

MILORGANITE Fertilizer

A NATURAL ORGANIC FOOD—Milorganite is a natural, unadulterated organic plant food. It contains more of the "basic" fertilizer elements than good old Barnyard Manure, and is richer in the vital "trace elements," also.

EFFECTS ON GROWTH ARE

tures. MILORGANITE promotes steady, healthy, uniform growth because its water-insoluble organic nitrogen is released slowly, and is converted into available plant food as needed. That's why lawns fed with Milorganite stay green longer.
